  Aug 2013 - Sep 2018

PROJECTS

- **GETIX (https://getix.herokuapp.com)**
  - This is a fullstack application for selling events ticket just like ticketswap. I made this project using ReactJs for frontend, NodeJS for backend and Postgres for the database.

- **OAuth 2.0 and OpenId Connect (https://auth-admin-client.herokuapp.com/)**
  - An authentication/authorization provider implemented in node.js. This project is a collaboration project and I added new feature which is email service that reset password.

- **MCU (https://mcu-vuejs.herokuapp.com/)**
  - A VueJS project to showcase all about Marvel Cinematic Universe made within three days for final presentation in the hackathon. This project has won 2nd place for best app.
